

REMARKS

Claims 1-34 have been cancelled. New claims 35-54 have been submitted as indicated above in accompaniment of a Request for Continued Examination under 37 C.F.R. § 1.114. The Applicant respectfully requests that this application be allowed and forwarded on to issuance.

§ 102 Rejections

Claims 1-34 stand rejected under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent Application Publication No. 2003/0191986 ("Cyran"). As claims 1-34 have been cancelled as indicated above, the § 102 rejections are now moot. The Applicant disagrees with the § 102 rejection of claims 1-34, but cancels claims 1-34 without waiver, prejudice, or disclaimer only to advance the prosecution of this application. The Applicant reserves the right to pursue these cancelled claims in the future.

New Claims

New claims 35-54 are submitted herewith in the interest of clarity and in moving the Application forward to allowance. The new claims 35-54 recite subject matter distinct from the art of record for at least the following reasons.

Fig. 4 of the Application as originally filed discloses the identification and graphical display of thread and process states respectively corresponding to software instructions (402) that have been executed on a processor. In turn, such software instructions are presented in Fig. 4 as data (408, 412, 416 and 418) plotted with respect to time, wherein the plotting format (e.g., heavy lines, dashed

lines, plus ("+") signs, etc.) is indicative of the thread and process state corresponding thereto (please refer to upper right corner of Fig. 4).

In any case, Cyran fails to provide, teach or suggest the foregoing features of the pending Application and as variously and respectively recited in the subject matter of the new claims 35-54. In fact, Cyran is totally devoid of any disclosure whatsoever as to thread and process states corresponding to software instructions, for any reason or in any context.

Conclusion

The Applicant requests favorable action on new Claims 35-54 at the earliest convenience of the Office. Accordingly, the Applicant requests consideration on the merits of new Claims 35-54 in favor of timely allowance.

Respectfully submitted,

Dated: 26 Jun 06 By:
